

OBTS Data Inventory

Introduction

OBTS Main Database

The Offender Based Transaction Statistics (OBTS) database is designed to provide information about trends in how felony arrests are handled in California. OBTS is an extract of California's Automated Criminal History System (ACHS), which is used, among other things, for background checks. The OBTS captures the arrest-cycle for all adult-level felony arrests (includes juveniles treated as adults), beginning with arrest itself and ending with a release, a decline to prosecute, a not guilty verdict, or a guilty verdict and a sentence. OBTS data begin in 1982 and contain 200,000 to 350,000 records per year. Each record includes the arresting officer's jurisdiction, the arrest date and BCS code for offense, the age/birth date of the arrestee, the arrestee's demographics, and, if applicable, charges pressed, charges convicted, and sentence type. The OBTS also contains direct identifiers such as name, CII, and DoB.

Background:

- Only 65-75% of felony arrest dispositions are captured annually (DO WE KNOW WHY?)
- The representativeness of OBTS data may vary by county (CONFIRM WITH MARIE OR RANDIE)
- Disposition data come from form link, which is filled out by law enforcement, the district attorney's office, and the courts
- OBTS only captures final dispositions, intermediate dispositions such as diversion programs or retrials are not included [WHAT DEFINES A DISPOSITION AS FINAL?]
- If there are multiple arrest offenses, the one shown is the most serious offense in terms of potential incarceration sentence
- If there are multiple conviction offenses, the one shown is the most serious offense in terms of potential incarceration sentence
- OBTS contains data about juveniles whose final disposition was in the adult criminal justice system

Historical Changes:

- Beginning in 1998, lower and superior courts could unify their data reporting
- From 1992 through 1997, convictions were prioritized for data entry, non-conviction records may be missing in higher numbers
- [FILE CREATION DATES AFFECTS NUMBER OF RECORDS PER YEAR - HOW DOES THIS WORK?]
- Offense data for 2002 may be missing due to data being entered in the wrong field

County-specific issues:

- Alameda: under-reporting of final dispositions from 1998 through 2002
- Contra Costa: Incomplete 2008 data
- Los Angeles: Missing thousands of dispositions from 1998 through 2000
- Sacramento: Incomplete 2008 data
- San Bernardino: Incomplete data from 1999 through 2001
- San Diego: Decrease in dispositions after 2000 may be result of a reporting issue
- San Francisco: Law enforcement makes very few final dispositions, more likely to send to DA; 2004 data may have errors; 2005 and 2010 data are incomplete;
- Santa Barbara: Data for 1993 through 1997 may be unreliable
- Ventura: Incomplete data from 1996 through 2001; incomplete data for 2010

Judicial Districts

Data were pulled from the 1982-2014 OBTS Tech Manual with the following changes:

- 6 records that did not conform to the practice of **County Name - Location** were modified by hand:

code	old name	county	location
29660J	Nevada County Court Nevada	Nevada	Nevada
31620J	Placer County Court - Colfax- Alta - Dutch Flat	Placer	Colfax/Alta/Dutch Flat
32630J	Plumas County Court - Almanor - Chester Branch	Plumas	Almanor/Chester Branch
34630J	Sacramento Court - Fair Oaks - Folsom	Sacramento	Fair Oaks/Folsom
35640J	San Benito Municip- Hollister	San Benito	Hollister
45633J	Shasta County Court Central Valley	Shasta	Central Valley
55650J	Tuolumne Court _ Fifth (Jamestown)	Tuolumne	Fifth (Jamestown)

- Records for when the word “County” was missing were assumed to be at the county level
- The record with “El Dorada” county was changed to “El Dorado” county
- The one instance of “Superior” court was changed to a county court

Is “Colfax/Alta/Dutch Flat” correct for Placer, as there is already a “Colfax”?

Tables

Main Table Variables

cii_record_type

Description

whether the individual in the record has other records that are digitized and whether those records can be linked using fingerprints

Labels

- 1 - automated
- 2- manual
- 3 - OBN (no CII record on file)
- 4 - Hybrid (began 1993)

Notes

automated: fully digitized record; manual: paper records only; hybrid: mix of paper and digitized records; OBN: records that are not linked via fingerprints

Summary

Name	Freq
automated	8782819
OBN	398939
manual	316923
hybrid	100757
NA	55556

cii_number

Description

Statewide unique identification number for an individual.

Prompt

Enter the unique state identification number, referred to as the “CII#”, assigned to the subject’s criminal history record. If no CII number is available or known to the agency, leave the area blank and continue processing the form.

pdr_id

Description

The Personal Descriptor Record ID indicates whether the offender is new to the system [CORRECT?]

Labels

- 00 - new offender (no arrest before 8/23/82)
- 01 - current offender (arrested before 8/23/82)
- 02 - unknown
- 09 - delete CII

Notes

proportion of current offenders highest when the data begin in 1982 but rapidly decreases to less than 10% - that implies only 10% of people arrested for a felony have a prior felony arrest???

Summary

Name	Freq
new_offender	7238025
current_offender	1701846
unknown	715123

name

Description

Individual's name.

Prompt

Enter the complete name of the subject as it was submitted on the arrest fingerprint submission or as indicated on the citation. Aliases, nicknames, or monikers are not required.

birth_year

Description

Individual's birth year.

Prompt

Enter the month/day/year (MM/DD/YYYY) of the subject's birth.

Summary

Name	Value
Min.	1891.000
1st Qu.	1959.000
Median	1966.000
Mean	1967.062
3rd Qu.	1976.000
Max.	1999.000

birth_month

Description

Individual's birth month.

Prompt

Enter the month/day/year (MM/DD/YYYY) of the subject's birth.

Summary

Name	Value
Min.	1.000000
1st Qu.	4.000000
Median	7.000000
Mean	6.568342
3rd Qu.	10.000000
Max.	12.000000
NA's	66806.000000

birth_day

Description

Individual’s birth day.

Prompt

Enter the month/day/year (MM/DD/YYYY) of the subject’s birth.

Summary

Name	Value
Min.	1.00000
1st Qu.	8.00000
Median	16.00000
Mean	15.62725
3rd Qu.	23.00000
Max.	31.00000
NA’s	67009.00000

gender

Description

Individual's sex/gender.

Labels

- M = Male
- F = Female
- X = Unknown

Prompt

Enter the appropriate sex code abbreviation for the subject.

Summary

Name	Freq
male	7861805
female	1787784
unknown	5405

race

Description

Individual's race/ethnicity.

Labels

see race_or_ethnicity.csv

Prompt

Enter the appropriate race code abbreviation for the subject. The criteria for determining race categories are in the TABLES Section.

Notes

The codes for Asian/Pacific Islander became more detailed in 1991. San Francisco did not change its reporting practices until 2012, when it adopted the FBI's categories for race: white, black, American Indian, other Asian, and other. Since 2012, San Francisco has not distinguished between non-Hispanic whites and Hispanic whites.

Summary

Name	Freq
white	3504045
hispanic	3241557
black	2358065
other	164450
unknown	132547

Mean	15.6296
3rd Qu.	23.0000
Max.	31.0000

arresting_agency

Description

Arresting or booking agency.

Labels

- PD Police Department
- SO Sheriff's Office (Department)
- CHP California Highway Patrol
- MR Marshal
- INS United States Immigration and Naturalization Service
- FBI Federal Bureau of Investigation
- DA District Attorney
- CA City Attorney
- NTF Narcotic Task Force

Prompt

Enter the complete name of the agency that arrested, cited, or requested a complaint be filed against the subject. Abbreviates for Type of Agency are acceptable; however, the county or city name should be spelled out followed by SO, PD, etc.

Notes

may actually be booking and not arresting agency

Data Cleaning

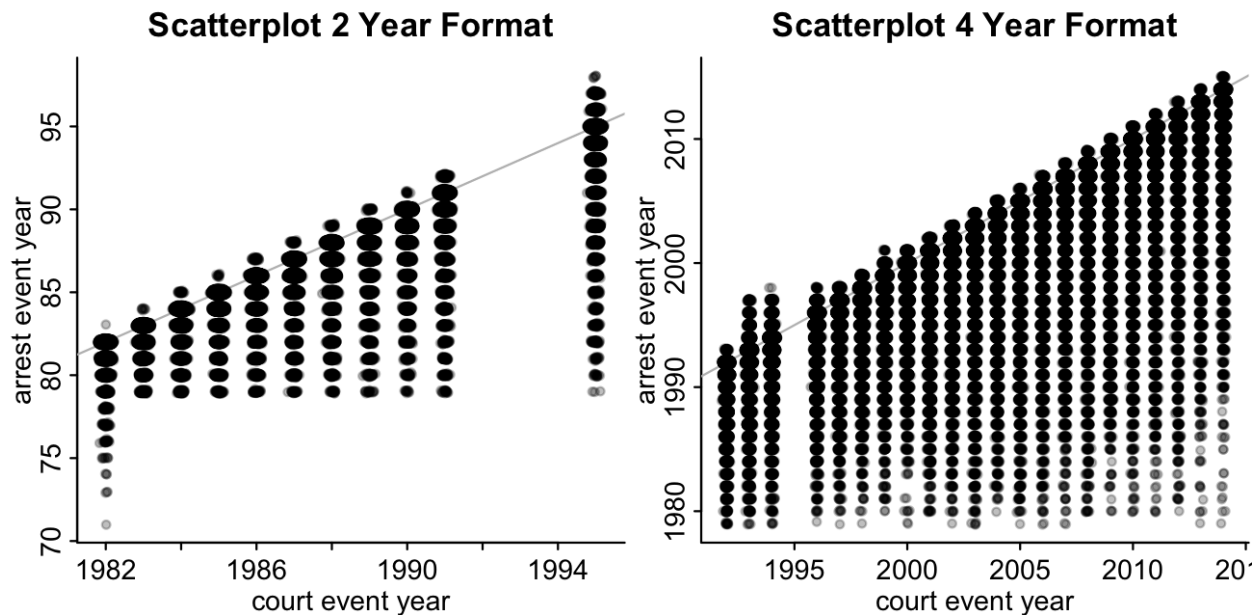

Court Event Date

Most of the single-digit births are from prior to 1992, when years were stored as only 2 digits. For reasons unknown, 1995 is also in a 2- digit year format. The court event year match that of the corresponding file, so that they range from 82 to 2014, and the missing digits can be safely added. 4 are unable to be parsed into a correct date:

court_event_year	court_event_month	court_event_day	court_event_date
1982	2	29	NA
1982	2	29	NA
1982	11	31	NA
1982	11	31	NA

Arrest Event Date

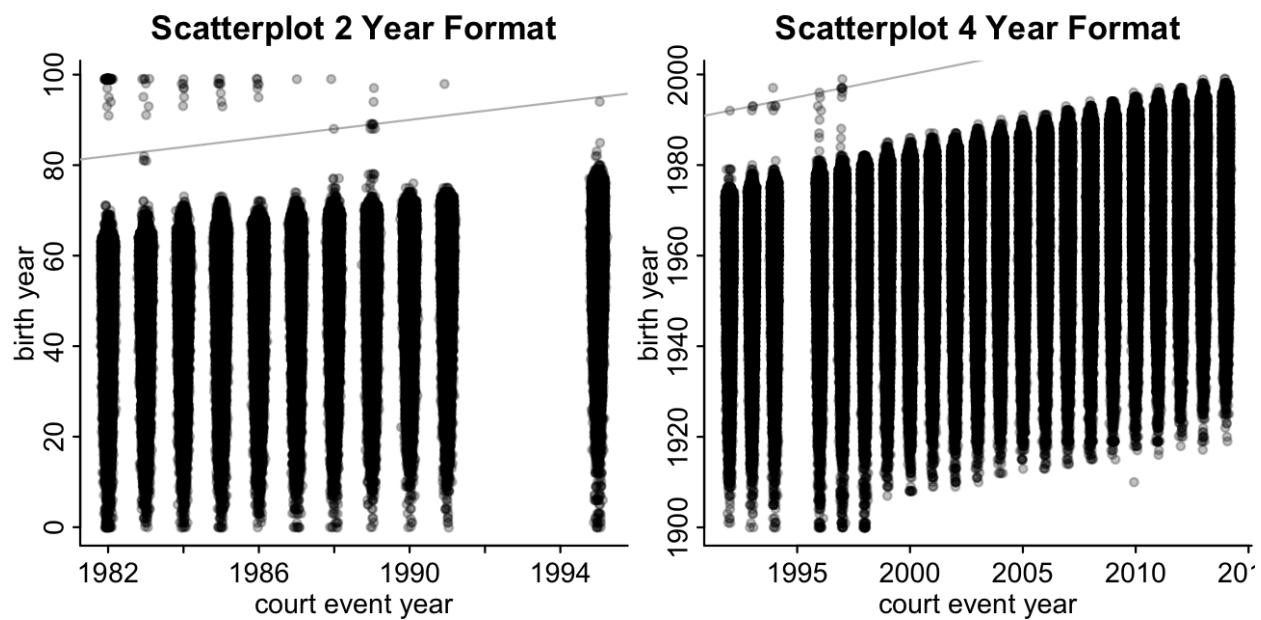

Arrest event codings appear to be more inconsistent. For all but 1982, arrest years go back no further than 1979. 1 record lie outside of this range. Nevertheless, it appears as if the two-year coded years can safely be converted to four-year codes. After doing so, 1 record fail to parse.

court_event_date	arrest_event_year	arrest_event_month	arrest_event_day	arrest_event_date
1982-11-05	1981	2	29	NA

Birth Date

The coding for birth years has numerous anomalies. 1982 has an abnormally large number of birth years equal to 99, while other years have clusters at 0.

birth_year	court_event_year						
	1982	1983	1984	1985	1986	1987	1988
4	14	10	7	13	4	9	1
3	13	5	6	4	8	5	4
2	11	6	4	5	2	0	0
1	16	3	7	2	2	1	4
0	19	2	5	8	1	7	5
99	93	4	1	2	2	1	1
98	0	1	2	4	2	0	0
97	1	0	2	0	1	0	0
96	0	0	0	1	0	0	0
95	1	1	1	0	1	0	0

In addition, there are a number of records where the birth-year is extraordinarily close to the court-event-year, including in the near-future.

birth_year	court_event_year								
	1983	1988	1989	1992	1993	1994	1995	1996	1997
81	3	0	0	0	0	0	0	0	0
82	1	0	0	0	0	0	0	0	0
88	0	1	3	0	0	0	0	0	0
89	0	0	5	0	0	0	0	0	0
94	0	0	0	0	0	0	1	0	0
1992	0	0	0	1	1	1	0	0	0
1993	0	0	0	0	2	3	0	0	0
1995	0	0	0	0	0	0	0	1	1
1996	0	0	0	0	0	0	0	1	1
1997	0	0	0	0	0	0	0	0	4
1999	0	0	0	0	0	0	0	0	1

To impute the century for the birth-year, we follow the rule:

1. If the listed 2-digit birth year is greater than 3 years from the court-event-year minus 1900, then we assume that it is in the 1800s.
2. Otherwise, we assume that it is in the 1900s.

This scheme allows the birth years that are close to the court years to persist, as that trend exists in the data sets for 4-digit years. These records bear further investigation as they seem unlikely to be correct.

After making this correction, a number of birth dates still cannot be successfully parsed, largely owing to a number of records that have either the birth month or birth day recorded as 0 (66931 rows). The remaining rows all seem to be coded as 99/99/99 and are in the court year 1982, indicating a particular kind of not-available.

court_event_date	birth_year	birth_month	birth_day
1982-02-24	1899	99	99
1982-01-28	1899	99	99
1982-12-02	1899	99	99
1982-12-02	1899	99	99
...

We can look at the distribution of ages in the data by subtracting the court event date from the birth date.

Arrest Disposition Date

The disposition dates can all safely be assumed to be in the same century as the court event, as it seems rare that the disposition date happens significantly after. Excluding those that are naturally missing, 2 dates cannot be parsed.

crt_evt_yr	crt_evt_mo	crt_evt_dy	arr_dsp_yr	arr_dsp_mo	arr_dsp_dy
1982	2	29	1982	2	29
1982	2	29	1982	2	29

Arrest and Court Disposition Types

There are two disposition fields in the OBTS, one corresponding to the arrest segment and one corresponding to the court segment. In general, when an arrest disposition is present that implies that the subject was released and no court disposition should be present. Conversely, if a court disposition is present, the subject was *not* released and thus should have no arrest disposition. In fact, whenever one is missing the other is present, however 347865 records have *both*.

Qualifier Codes Over Time

This section shows the usage of qualifier codes over time. The vast majority of codes are used < 10 times overall, while a few have usages in the thousands. The following histograms show the frequencies of total occurrences, that is the codes are tabulated across all records and what is displayed is how many have those counts.

Codes with 500 or more usages in the arrest or court section are show in the table below. When a value is given as **NA**, it does not exist in the qualifier codes section of the OBTS Tech Manual.

qualifier	arrest_count	court_count	literal_short	type	literal
AQ	386809	0	ZZZZ	XX	WARRANT
AB	130297	78196	ZZZZ	XX	ATTEMPTED
AC	113670	0	ZZZZ	XX	BENCH WARRANT
AW	74318	0	NA	NA	NA
XX	28688	37769	NA	NA	NA
KA	0	39898	NA	NA	NA
MJ	0	38754	NA	NA	NA
BI	37824	0	ATTEMPT	PC	ATT TO COMMIT CRIME
AV	34626	0	ZZZZ	XX	COURT REMAND
AU	28470	0	ZZZZ	XX	BOOK / RELEASE
ML	0	24701	NA	NA	NA
MC	0	21172	NA	NA	NA
AT	19482	0	ZZZZ	XX	CRT ORDER BOOK
ME	0	19466	NA	NA	NA
MB	0	15846	NA	NA	NA

qualifier	arrest_count	court_count	literal_short	type	literal
AP	12735	0	ZZZZ	XX	PROBATION VIOL
MD	0	12675	NA	NA	NA
AJ	12598	0	ZZZZ	XX	FAIL TO APPEAR
MM	1443	10732	PRIOR	PC	FEL/WHILE ON BAIL OR RECOG
MW	0	9474	NA	NA	NA
MK	0	8350	NA	NA	NA
NS	0	8111	NA	NA	NA
BQ	6260	0	PROBATION	PC	PROB VIOL/REARRESTED
ON	0	3011	ZZZZ	XX	INVOLVE FIREARM
...

Finally, we show the usage of codes over time.
